

How to assemble your SSR100/W

Key Information

2 Person Assembly Recommended.

Push Fit Assembly - No Bolts Required.

No Tools Required To Build This Product.

This product can be assembled within 10 minutes.

This product is rated as EASY to assemble.

Check Chair Structure Every 3 Months for Max Stability.

Please note that this product will be heavy when assembled. Please ensure that if you need to lift or carry this product that you do not do this by yourself.

1 The Base and Gas Lift

Place the base on a flat, hard surface, with the gas lift locator hole facing upwards. Remove the gas lift from its packaging and place the widest end into the gas lift locator hole of the base.

2 !IMPORTANT! Remove the cap

Remove the black cap from the top of the gas lift. Failing to remove this will stop the gas lift connecting to the seat properly, making the product unstable.

3 Complete Assembly

Locate the stool seat assembly on to the gas lift, pressing down firmly to connect the gas lift to the seat. Test the height adjustment function by pressing the button located on either side of the under-seat is working before using.
